The Dealer and its affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and its affiliates in the ordinary course of business.

Société Générale will ensure the roles of provider of hedging instruments to the Issuer of the Certificates and Calculation Agent of the Certificates.

The possibility of conflicts of interest between the different roles of Société Générale on one hand, and between those of Société Générale in these roles and those of the Certificateholders on the other hand cannot be excluded.

Furthermore, given the banking activities of Société Générale, conflicts may arise between the interests of Société Générale acting in these capacities (including business relationship with the issuers of the financial instruments being underlyings of the Certificates or possession of non public information in relation with them) and those of the Certificateholders. Finally, the activities of Société Générale on the underlying financial instrument(s), on its proprietary account or on behalf of its customers, or the establishment of hedging transactions, may also have an impact on the price of these instruments and their liquidity, and thus may be in conflict with the interests of the Certificateholders.

Key risks that are specific to the guarantor :

Due to Société Générale's role as guarantor and counterparty to the Issuer's hedging transactions, investors are essentially exposed to Société Générale's credit risk and have no recourse against the Issuer in the event of the Issuer's default.

WHAT ARE THE KEY RISKS THAT ARE SPECIFIC TO THE SECURITIES?

Any sale of the Certificates prior to the scheduled maturity date will result in the loss of the full protection of the amount invested.

Although it is subject to market making agreement, the liquidity of the product may be affected by exceptional circumstances that make it difficult to sell the product or at a price that results in a total or partial loss of the amount invested.

The possibility of an early redemption of the Certificates at the Issuer's discretion may limit their market value. Before or during each period during which the Certificates may be redeemed early, their market value will not rise substantially above their redemption price.

The market value of the Certificates depends on the evolution of market parameters at the time of exit (price level of the Underlying(s), interest rates, volatility and credit spreads) and may therefore result in a risk of total or partial loss on the amount initially invested.

Events unrelated to the Underlying(s) (e.g. change in law, including tax law, force majeure, number of securities in circulation) may lead to early redemption of the Certificates and thus to total or partial loss of the amount invested.

Events affecting the Underlying(s) or hedging transactions may lead to adjustments, de-indexation, substitution of the Underlying(s), or early redemption of the Certificates and consequently to losses on the amount invested, including in the case of capital protection.

If the currency of the investor's main activities is different from that of the product, the investor is exposed to currency risk, especially in the event of exchange controls, which may reduce the amount invested.

The performance of the reference rate(s) is dependent on economic and political factors. Such factors could have a negative impact on the performance of the reference rate(s) and consequently on the value of the Certificates. These factors can be expected to intensify in periods of financial turmoil.

Société Générale will ensure the roles of provider of hedging instruments to the Issuer of the Certificates and Calculation Agent of the Certificates.

The possibility of conflicts of interest between the different roles of Société Générale on one hand, and between those of Société Générale in these roles and those of the Certificateholders on the other hand cannot be excluded. Furthermore, given the banking activities of Société Générale, conflicts may arise between the interests of Société Générale acting in these capacities (including business relationship with the issuers of the financial instruments being underlyings of the Certificates or possession of non public information in relation with them) and those of the Certificateholders. Finally, the activities of Société Générale on the underlying financial instrument(s), on its proprietary account or on behalf of its customers, or the establishment of hedging transactions, may also have an impact on the price of these instruments and their liquidity, and thus may be in conflict with the interests of the Certificateholders.

Rischi chiave specifici del garante

Considerando che Société Générale è garante e controparte delle operazioni di copertura dell'Emittente, gli investitori sono essenzialmente esposti al rischio di credito di Société Générale e non hanno ricorso nei confronti dell'Emittente in caso di inadempimento dell'Emittente.

QUALI SONO I RISCHI CHIAVE SPECIFICI DEI TITOLI?

La vendita delle Certificati prima della prevista data di scadenza determinerà la perdita della protezione totale dell'importo investito.

Benché sia oggetto di impegni di market making, la liquidità del prodotto può essere influenzata dal verificarsi di circostanze eccezionali che potrebbero rendere difficile vendere il prodotto o comunque ad un prezzo che produce la perdita totale o parziale dell'importo investito.

Il valore di mercato dei Certificati dipende dall'evoluzione dei parametri di mercato al momento dell'uscita (livello dei prezzi dei Sottostanti, tassi di interesse, volatilità e credit spreads) e può pertanto comportare un rischio di perdita totale o parziale dell'importo inizialmente investito.

Il verificarsi di eventi non legati al Sottostante (quali la modifica di previsioni di legge, inclusa la normativa fiscale, eventi di forza maggiore) possono determinare il rimborso anticipato dei Certificati e quindi la perdita totale o parziale dell'importo investito.

Il verificarsi di eventi relativi al Sottostante ovvero a operazioni di copertura può determinare la necessità di rettifiche, de-indicizzazioni, sostituzione del Sottostante, e di conseguenza a perdite del capitale investito, anche in caso di prodotti a capitale protetto.

Se la valuta di riferimento delle attività principali dell'investitore è diversa da quella del prodotto, l'investitore è esposto al rischio di cambio, in particolare in caso di controlli sul cambio, che potrebbero ridurre l'importo investito.

L'andamento del tasso di riferimento è influenzato da fattori economici e politici. Tali fattori potrebbero incidere negativamente sulla performance del tasso di riferimento e, conseguentemente, sul valore dei Certificati. È prevedibile che tali fattori si intensifichino in periodi di turbolenza finanziaria
